

**Automotive**  
solutions in movement

Thomas Regout International B.V. offers a broad range of sliding solutions that help move your application in any direction: horizontal, vertical and diagonal.

Our slides can be found in a wide range of applications in many market segments. In our long history we have grown into the company we are today: a major innovative player in automotive and industrial markets, as well as in furniture, professional storage and audio visual segments. We are continuously broadening our product range with new product groups, features and other solutions to fulfil your needs.

## Automotive

Thomas Regout International B.V. is a reliable and flexible partner in designing and producing sliding solutions for the automotive industry. Our technical knowledge combined with the use of high quality materials and an extensive quality control program, allow us to develop high quality products incorporating the highest standard for the automotive industry: ISO/TS 16949. From supplying a smooth moving superior and cost friendly arm rest slide used in personal cars, supplying complex heavy duty sliding solutions for special vehicles, to all different kinds of sliding requirements in the truck industry. We at Thomas Regout are convinced we have the right solution.

Personal cars

Special vehicles

## Products

Our tailor made range for the automotive industry is divided into four main categories, all designed in accordance with the highest quality standard.

**ULF HD** This 3 beam slide is mostly used for refrigerator and bed applications within trucks and specials vehicles. A high load capacity, smooth movement and unique features in combination with special fixations guarantees a long, safe and reliable lifetime.

**HAS** Special sliding strips are used for a smooth movement experience, giving the right feeling and functionality. The Horizontal Armrest Slide (HAS) is applicable in the automotive industry and any other application where movement with a constant friction force is required.

**TR-7619** The TR-7619 is very robust and rigid. This roll formed, extra heavy duty telescopic slide exceeds a load capacity of 300 kg with a minimum of deflection. This type of slide includes heavy duty stops and has an unique ball cage design. The TR-7619 is used in loading platforms and special vehicles.

**ULF HD ALU** Our aluminium slides have a 30% - 50% lower weight than the standard steel ones, offering considerable weight reduction advantages. By using the aluminium disconnect, the drawer can be removed from the cabinet with only one push.

“We guarantee movement in any direction using the highest quality standards, a slide to success.”
