

Industry

solutions in movement

Thomas Regout International B.V. offers a broad range of sliding solutions that help move your application in any direction: horizontal, vertical and diagonal.

Our slides can be found in a wide range of applications in many market segments. In our long history we have grown into the company we are today: a major innovative player in automotive and industrial markets, as well as in furniture, professional storage and audio visual segments. We are continuously broadening our product range with new product groups, features and other solutions to fulfil your needs.

Industry

Thomas Regout International B.V. is a global supplier in the design and production of telescopic slides for a wide range of industrial equipment applications. We offer an extensive line of unique features to meet the specific demands of our customers. In our own R&D department we design high quality innovative sliding systems. If required, tailor made by co-creating with our customers. Our slides are maintenance free, characterized by a long life time quality and suitable for high load capacities.

Our main focus is to be and to remain the best quality partner for our customers in mutual beneficial partnerships: a partnership that adds value and strengths to your and our organization.

Vending &
Self-Checkout machines

Electro Technical

Products

Our heavy duty linear movement products are uniquely designed to offer the highest degree of rigidity, robustness, and includes high quality components to guarantee a long life cycle.

Condor The Condor is a 4 beam slide designed to offer a 150% to 180% extension. With these specifications the Condor is most suitable for applications in ATM and ticketing machines.

TR-7619 The TR-7619 is very robust and rigid due to the material thickness. This roll formed, extra heavy duty telescopic slide exceeds a load capacity of 300 kg with a minimum of deflection. The TR-7619 is used in loading platforms, special vehicles and tooling cabinets.

FlexFit The FlexFit guide combines a profile and a carrier that enables multiple motion options. The different types are suited for different load capacities and can be used in vertical, horizontal and diagonal direction. Typical applications for the FlexFit are vending machines and sliding doors.

“We co-create together with our customers and therefore offer custom-made solutions that exactly fit their needs.”
